

RESIWELL[®]

Rainwater Recycling

Not out of mind - Out of sight[™]

Frankston Concrete Products has been a market leader in the industry for over 50 years. Ask one of our helpful sales staff how we can best help you with your rainwater saving initiatives.

Rainwater Recycling

Collected rainwater is used to supply toilet, laundry and to water the garden. If the tank level is too low, mains water is used automatically.

FCP can fit out the Resiwell[®] in the yard for easier installation thus lowering on site costs.

Resiwell's[®] are available with light or heavy duty lockable covers for front, backyard or driveway use.

Sizes

TANKS

2,000 litre*
3,500 litre
7,000 litre
10,000 litre
Other sizes available

PUMPS

80 litre/minute 350kpa
80 litre/minute 500kpa

Totally silent & economical. Comes complete with Rainsaver Control Cabinet.

* 2,000 litre is the minimum requirement for the Water Smart rebate.

The Victorian Government requires rainwater tanks be installed in all new dwellings.

Note: You do not need council approval for underground tanks.

The Water Smart Rebate is now available when installing the Resiwell water saving system.

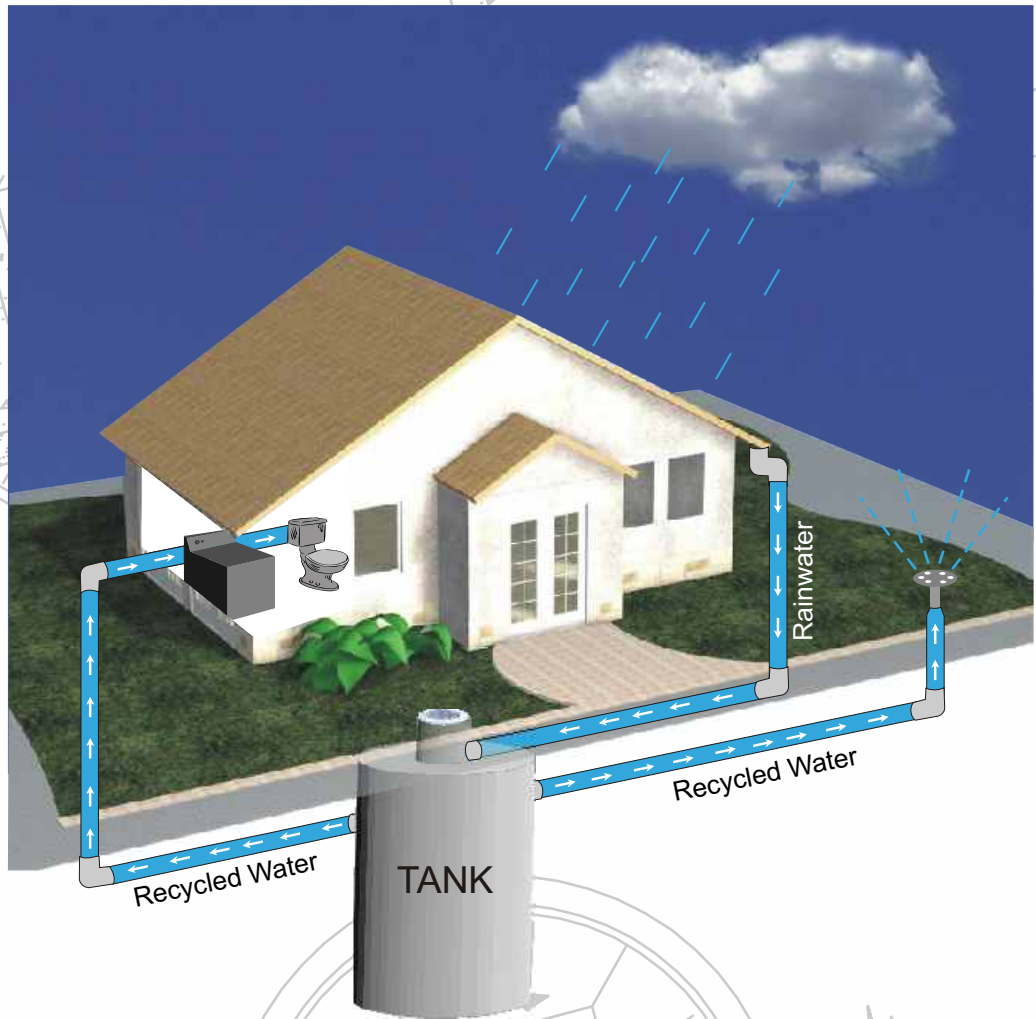

Frankston Concrete Products 30-44 Miles Grove, Seaford, Victoria 3198

Installation

Ideal for domestic, commercial or industrial applications
Tanks are buried out of sight - not out of mind
Ideal for small backyards
Suitable under driveways
Available with light or heavy cover
Submersible pump - **totally silent**
Save on water bills
Tanks will not 'float' as is often the case with underground Poly or Plastic tanks which require concrete anchors
